10	Performance Monitoring Data (Pages 3 - 14) Report to be tabled. Emma Bennett, Service Director – Community.

Key Points to Note

Demographics

A considerably lower proportion of LAC are from BME backgrounds compared to the Wolverhampton CYP population.

The number of Looked After Children continues to decrease although considerable further reduction is required to bring Wolverhampton in line with our comparators.

Placements

In-house Foster Carers trend data shows that the percentage of children placed with in-house foster carers is at its highest in the past two years although actual numbers remain static.

The proportion of LAC placed more than 20 miles from home remains at 13%.

The indicators that look at placement stability have remained static in the month against a backdrop of reducing LAC numbers and increased adoptions. However, stability generally continues to show positive results and demonstrates that Looked After Children in Wolverhampton benefit from stable placements.

Routes into Care and Ofsted Ratings

This data shows which proportion of LAC were known to children's services in the 30 days prior to becoming looked after and the proportion of LAC that are asylum seekers and UASC (unaccompanied asylum seekers). Please note that children are classed as CiN if they are in the process of being assessed and may not have been CiN for very long or the subject of formal CiN plans. On-going work is being undertaken to identify how many children were also known to Early Help services and it is anticipated that this will be available by the end of the year.

The report now also shows the number of children placed in children's homes and the Ofsted ratings of those homes - of the 36 children currently placed in children's homes, 29 (80%) are in homes that are rated good or outstanding.

Assessments and Reviews

Assessments and Reviews of Looked After Children in Wolverhampton remain generally up to date although performance has dropped in the past few months to 94%. The percentage of children that participated in their reviews remains at 93% which is the same as the year out turn 2015/16 result of 93%.

Education

The 2015 KS2 results show that performance of Wolverhampton LAC has deteriorated compared with 2014 across reading, writing and maths. 2015 comparator data has now been updated and shows that Wolverhampton performed slightly worse in KS4 but better in GCSEs.

GCSE performance is more positive compared with last years out-turn - with 20% of LAC achieving 5 GCSEs grade A-C including English and Maths compared to 17% last year.

Please noted that small numbers can make these measurements volatile. For further information about the education attainment of LAC in Wolverhampton please refer to the Virtual School Head teacher annual report.

Health

The percentage of children with up to date dental checks was 85% at the end of November. This result remains significantly higher than the 60% of children in the general Wolverhampton population that have seen a dentist in the past 2 years which is falling.

The percentage of health checks that are up to date is also at 85% at the end of November, a slight decrease on the year end out-turn 2015/16 of 88%. Most children who do not have up to date health checks are placed outside of the city.

Leaving Care

Adoption - Adoption timeliness in 2016/17 continue to perform above national targets. There have been 24 adoptions so far in 2016/17, 73% of being within timescales.

The adoption pipeline shows that there are currently 72 children with a plan of adoption, 37 of which have placement orders or are currently placed for adoption. The placements and plans for some of the children are currently being reviewed and not all the children will be adopted.

62 children were adopted in 15/16 compared to 51 in the previous year. This is extremely positive.

Care Leavers - The percentage of Care Leavers in Employment Education and Training cohort has changed to include all children and young adults who turn 17 to 21 in the year. At the end of November 56% of 17-21 year olds were in Education, Employment or Training. NALM (not available for the labour market) data has now been included and shows that out of 147 care leavers in the cohort, 78% of care leavers are available for work with 22% (41 young people) not available due to pregnancy or young motherhood, illness or disability or because they are in custody.

Work continues in this area to ensure that education, employment and training information is recorded and updated.

The proportion of care leavers currently deemed to be in suitable accommodation is also included and shows that 90% of the cohort are currently in suitable accommodation.

PLEASE NOTE: Small numbers in the cohort reaching each key stage can cause results to be volatile making comparison difficult.

National results show that looked after children reaching KS2 level 4 in Maths, Reading and Writing in 2015 performed worse than in 2014. However, performance in GCSE's was better.

Detailed analysis of LAC educational performance was presented to the Panel via the Virtual School Head teacher report. Please note that there is some discrepancies when nationally published data is compared with locally held data - it is the national data that is presented here.

A2 - 238 days

A10 - 518 days

Single year performance (2016/17 as at 31st July)

A1 - 509 days with 73%% of children adopted within timescales

A2 - 203 days

A10 - 479 days

The adoption scorecards for 2012-15 were published in March 2016. Wolverhampton were once again rated 'double red' in the two key indicators, however, performance around adopting hard to place children including those over the age of 5 and from BME backgrounds continues to be better than performance nationally. Detailed analysis of the results has been undertaken and is available.
