

# Building Energy Audits

12 September 2023

# Building Energy Audits

- Reports are focusing on top 50 buildings with the highest energy usage (released in batches of 10).
- All reports to be completed by December 2023.
- Civic Centre report completed; this is now acting as the template for the 49 building energy audit reports. A further 9 audits are currently underway.
- Following the completion of the energy audit reports, a detailed feasibility study will be undertaken to estimate costs for the retrofit works (e.g., insulation, double glazing, LED's, BMS, Heating). Renewable energy sources will also be investigated.
