

Interest rate forecasts

The Council's treasury advisor, Link Asset Services, has provided the following forecast:

	Nov-17	Dec-17	Mar-18	Jun-18	Sep-18	Dec-18	Mar-19	Jun-19	Sep-19	Dec-19	Mar-20	Jun-20	Sep-20	Dec-20	Mar-21
BANK RATE	0.50	0.50	0.50	0.50	0.50	0.75	0.75	0.75	0.75	1.00	1.00	1.00	1.25	1.25	1.25
5 yr PWLB	1.50	1.50	1.60	1.60	1.70	1.80	1.80	1.90	1.90	2.00	2.10	2.10	2.20	2.30	2.30
10 yr PWLB	2.10	2.10	2.20	2.30	2.40	2.40	2.50	2.60	2.60	2.70	2.70	2.80	2.90	2.90	3.00
25 yr PWLB	2.70	2.80	2.90	3.00	3.00	3.10	3.10	3.20	3.20	3.30	3.40	3.50	3.50	3.60	3.60
50 yr PWLB	2.40	2.50	2.60	2.70	2.80	2.90	2.90	3.00	3.00	3.10	3.20	3.30	3.30	3.40	3.40

Economic forecasting remains difficult with so many external influences weighing on the UK. Our Bank Rate forecasts, (and also MPC decisions), will be liable to further amendment depending on how economic data and developments in financial markets transpire over the next year. Forecasts for average earnings beyond the three year time horizon will be heavily dependent on economic and political developments. Volatility in bond yields is likely to endure as investor fears and confidence ebb and flow between favouring relatively more "risky" assets i.e. equities, or the "safe haven" of government bonds.

The overall longer run trend is for gilt yields and PWLB rates to rise, albeit gently. A world economic recovery will likely see investors switching from the safe haven of bonds to equities.

We have pointed out consistently that the Fed. Rate is likely to go up more quickly and more strongly than Bank Rate in the UK. While there is normally a high degree of correlation between the two yields, we would expect to see a growing decoupling of yields between the two i.e. we would expect US yields to go up faster than UK yields. We will need to monitor this area closely and any resulting effect on PWLB rates.

- The overall balance of risks to economic recovery in the UK is probably to the downside, particularly with the current level of uncertainty over the final terms of Brexit.
- The balance of risks to increases in Bank Rate and shorter term PWLB rates are probably to the upside and are dependent on how strong GDP growth turns out, how quickly inflation pressures rise and how quickly the Brexit negotiations move forward positively.
- Our forecasts are predicated on an assumption that there is no break-up of the Eurozone or EU, (apart from the departure of the UK), within our forecasting time period, despite the major challenges that are looming up, and that there are no major ructions in international relations, especially between the US and China / North Korea, which have a major impact on international trade and world GDP growth.

APPENDIX C

Downside risks to current forecasts for UK gilt yields and PWLB rates currently include:

- Bank of England monetary policy takes action too quickly over the next three years to raise Bank Rate and causes UK economic growth, and increases in inflation, to be weaker than we currently anticipate.
- Geopolitical risks, especially North Korea, but also in Europe and the Middle East, which could lead to increasing safe haven flows.
- A resurgence of the Eurozone sovereign debt crisis, possibly Italy, due to its high level of government debt, low rate of economic growth and vulnerable banking system.
- Weak capitalisation of some European banks.
- The result of the October 2017 Austrian general election is likely to result in a strongly antiimmigrant coalition government. In addition, the new Czech prime minister is expected to be Andrej Babis who is strongly against EU migrant quotas and refugee policies. Both developments could provide major impetus to other, particularly former Communist bloc countries, to coalesce to create a major block to progress on EU integration and centralisation of EU policy. This, in turn, could spill over into impacting the Euro, EU financial policy and financial markets.
- Rising protectionism under President Trump
- A sharp Chinese downturn and its impact on emerging market countries

The potential for upside risks to current forecasts for UK gilt yields and PWLB rates, especially for longer term PWLB rates include:

- The Bank of England is too slow in its pace and strength of increases in Bank Rate and, therefore, allows inflation pressures to build up too strongly within the UK economy, which then necessitates a later rapid series of increases in Bank Rate faster than we currently expect.
- UK inflation returning to sustained significantly higher levels causing an increase in the inflation premium inherent to gilt yields.
- The Fed causing a sudden shock in financial markets through misjudging the pace and strength of increases in its Fed. Funds Rate and in the pace and strength of reversal of QE, which then leads to a fundamental reassessment by investors of the relative risks of holding bonds, as opposed to equities. This could lead to a major flight from bonds to equities and a sharp increase in bond yields in the US, which could then spill over into impacting bond yields around the world.
