<p>Building Regulations Schedule One of the Building Act 1984 identifies the Regulations which Local Authorities have a duty to enforce in relation to the setting of Building Control Charges. These charges have been set in accordance with the Building (Local Authority Charges) Regulations 2010 (as required by the Building Act 1984). The accounting objective of the regulations requires local authorities to ensure that 'taking one financial year with another' their charges income, as nearly as possible, equates to the costs incurred by the authority in carrying out certain 'chargeable' building control functions and providing chargeable advice. The intention is to breakeven and achieve full cost recovery in relation to the building control functions that the regulations authorise a charge to be made. The overriding principle of the regulations and the proposed charging scheme is that the customer should pay for the level of building control input appropriate to their application.</p>
