**Also, to include:**

- As and when issued, CIPFA's Audit Committee Technical Updates will be brought before the Committee
- Audit fee letter – once further guidance issued as to when and where this should be presented

**Note 1: Risk Management / Corporate Risks Reports**

An annual cycle of reports from:

- Chief Executive
- Director for Delivery
- Director for Community
- Director for Education and Enterprise

These reports should provide Audit Committee with assurance of that adequate governance and risk management arrangements are in place within each service group. They will focus on the ongoing operational activities of the service group rather than major projects which are picked up in the reports on Major Projects/Partnerships in the workplan. Key questions which may inform the report to Audit Committee include:

- What are the key statutory functions the service group is required to deliver?
- What are the key strategic objectives that the service group is responsible for delivering?
- What arrangements are in place to ensure these key statutory functions and strategic objectives are properly delivered?
- What are the main 'red risks' that the service group has to manage on an ongoing basis and how are these risks managed?
- What external assurance is available eg external inspection reports. How have significant issues identified in such reports been addressed?
- What significant problems have occurred in the past year and what arrangements have been made to avoid such problems going forward?

Assurance gained on the corporate governance arrangements in place within the service groups will inform the Annual Governance Statement.

**Final Accounts Monitoring & Review Sub-Committee
