Consultation Response Form

The four Black Country Councils welcome your views and comments on the draft version of the Black Country Local Flood Risk Management Strategy and the supporting Strategic Environmental Assessment Report.

The draft Strategy sets out how the Black Country Councils as the Lead Local Flood Authorities will work in partnership to improve management of local flood risk for the benefit of people, property, land and the environment.

Please refer to the consultation documents for the Black Country Local Flood Risk Management Strategy and then use this form to give us your views on the questions set out below together with any other comments you may wish to make.

Please note your answers and any comments you may wish to make can be specific to your Council or for the Black Country.

The closing date for comments is 17th December 2015.

Your Contact Details

Name..................................................................................................................
Organisation....................................................................................................
Address ............................................................................................................
Email Address ..................................................................................................
Telephone Number ...........................................................................................

1. Do you agree with the approach taken by the four Black Country Councils as the Lead Local Flood Authority in the development and contents of the draft Strategy (Guidance issued by the Local Government Association November 2011 has been used to develop the strategy)
2. Does the Strategy clearly indicate and explain the Council’s and other Partners roles and responsibilities.

3. Do you agree with the approach taken by the Councils to the management of flood risk including:

   Developing a risk based approach based on establishing a local significance consequence

   Making information freely available
4. Do you agree with Councils approach to the investigation and reporting of locally significant flood incidents

5. Do you agree with the approach being taken to the implementation of Sustainable Urban Drainage schemes via the Planning Application Process.
7. Do you agree with the proposals to make all relevant local flood risk information publicly accessible?

If you agree

What information do you think should be made publicly available?

If you disagree

What information do you think should not be published and why?

9. Do you agree with the approach taken to develop Council Action Plans within the Strategy
10. Do you have any other issues or concerns about the draft Strategy
