Drive progress through performance improvement				
a) Improve data quality standards to meet regulatory requirements	Review of performance against specific targets set by the regulator in respect of completeness and accuracy of data	Achieve targets set by the regulator	Ongoing/annual	Fund data has been assessed relative to the "common data" requirements and a set of "conditional data" requirements, as set out by the Pensions Regulator for private sector schemes. An assessment of the Fund data relative to new public sector record keeping requirements, introduced in April 2015, is underway. Both the regulatory requirements and employer performance following the 2014 data cleansing review and 2015 Annual Return exercise have been reviewed, and Data Improvement Plans are being developed with major employers. The Fund is looking to more closely monitor employer performance against the administration strategy and impose charges, in line with this, for poor performance. The Fund will also pass on costs to employers for additional Annual Benefit Statement work.
	Outcome of reviews by the regulator and internal audit	Positive reports by review bodies	Ongoing/annual	Reviews to be considered as and when appropriate.
b) Develop cross-cutting key performance indicators focused on service priorities	Performance against new key performance indicators (KPIs)	The aim is for the pension administration service to operate at 85% (or better) in accordance with the standards set	Monthly	Revised KPIs have been implemented with effect from January 2015 and these have been monitored and amended where necessary. Emphasis will be given to ensuring that the focus remains on these KPIs at the same time as managing the overall workload. Standards are being met in the majority of cases, although performance has been below target in some areas of pension administration following the implementation of LGPS 2014. 2014 changes are still restricting some processes but, in the main, this is now due to limited internal resource to test and implement system developments.
