The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Fund or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Introduction

This document provides an overview of the indicative planned scope and timing of the statutory audit of West Midlands Pension Fund ('the Fund') for those charged with governance. It sets out the risks that we anticipate will drive the focus of our audit based on our knowledge of the Fund from the prior year and discussions with management. It is important to note that our risk assessment is an iterative process and we will revisit our assessment on an ongoing basis bringing any new risks to your attention if and when they arise.

We will provide our formal Audit Plan for consideration subsequent to conclusion of planning and interim procedures and anticipate presenting this to the Pensions Committee in June 2022.

Respective responsibilities

The National Audit Office ('the NAO') has issued a document entitled Code of Audit Practice ('the Code'). This summarises where the responsibilities of auditors begin and end and what is expected from the audited body. Our respective responsibilities are also set out in the agreed engagement letter and addendum to the contract. We draw your attention to both of these documents.

Scope of our audit

The scope of our audit is set in accordance with the Code and International Standards on Auditing (ISAs) (UK). We are responsible for forming and expressing an opinion on the Fund's financial statements that have been prepared by management with the oversight of those charged with governance (the Pensions Committee.)

The audit of the financial statements does not relieve management or the Pensions Committee of your responsibilities. It is the responsibility of the Fund to ensure that proper arrangements are in place for the conduct of its business, and that public money is safeguarded and properly accounted for. We have considered how the Fund is fulfilling these responsibilities.

Our audit approach is based on a thorough understanding of the Fund's business and is risk based.

Financial Statements Audit 2021/22

Materiality

The concept of materiality

Materiality is fundamental to the preparation of the financial statements and the audit process and applies not only to the monetary misstatements but also to disclosure requirements and adherence to acceptable accounting practice and applicable law. Misstatements, including omissions, are considered to be material if they, individually or in the aggregate, could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

We have set an outline planning materiality based on the Fund's September 2021 valuation adjusted downwards by approximately 10% to reflect market conditions as a result of the Ukraine crisis. We are currently working to planning materiality of £180m (performance matieriality; £126m)

Informing the audit risk assessment

To inform our planning we attach with this report responses from management to a series of questions posed across the themes of fraud, laws and regulations, going concern, related parties and accounting estimates.

Significant risks

Although we have started our planning work we are not at a stage where we can formally confirm the significant risks that we will be auditing. However, the sections below indicate likely areas that we expect our work to focus on.

Presumed significant risks

ISA (UK) 240 includes two presumed risks as follows:

- Revenue recognition may be misstated due to the improper recognition of revenue. This is a rebuttable risk if the auditor concludes that there is no risk of material misstatement due to fraud relating to revenue recognition. We will consider the risk factors set out in ISA240 and the nature of the revenue streams at the Fund to determine whether there is a risk of fraud from revenue recognition. We are cognisant that the revenue funding for the Fund this year continues to fluctuate as a result of variable deficit and other contributions payment profiles from member employers and we will be documenting the business processes of these streams as part of our planning procedures to help inform our consideration of the revenue recognition risk.
- The risk of management over-ride of controls is present in all entities. The need to achieve a particular financial outturn could potentially place management under undue pressure in terms of how they report performance.

Valuation of Direct Property holdings and other Level 3 investments – The Fund revalues its property portfolio and other investment holdings throughout the year to reflect the most up to date position. To achieve this, the Fund requests valuations from its property valuation experts and fund managers. These valuations represent a significant estimate by management in the financial statements due to the value involved and the sensitivity of this estimates to changes in key assumptions. It is therefore expected that the valuation of these assets will continue to be identified as a significant risk. Due to the distinct nature of Direct Property holdings we will likely continue to treat these as a separate area of focus from the residual balance of level 3 investments and appoint our own auditor's expert to assist our work.

Other expected areas of focus

- The valuation of the former ITA Pension Fund's bulk annuity insurance buy-in is highly subjective due to a lack of observable inputs. We will continue to assess the Fund's own expert and appoint our auditor's expert to assist us in gaining appropriate assurance.
- In line with the Public Audit Forum Practice Note 10 in the public sector, auditors must also consider the risk that material misstatements due to fraudulent financial reporting may arise from the manipulation of expenditure recognition. We do not anticipate there being a significant risk in this regard, but will consider as part of our planning processes and again on receipt of the draft financial statements whether there is an increased level of risk associated with these transactions which would require additional audit effort to be made.
- We have previously provided information to the Committee on the new accounting standard on Estimates. This raises the bar in terms of what both we and management are required to do. This will continue to occur to in 2021/22 and will also apply to any other material estimates made by management.
- Whilst not deemed a significant risk, Level 2 investment valuations, completeness of contributions and completeness of benefits payable will also be areas of focus during the audit.

Audit Deliverables

2021/22 Deliverables	Planned Date	Status
Audit Plan and Interim Audit Findings We are required to issue a detailed audit plan to the Pensions Committee and the City of Wolverhampton's Audit & Risk Committee setting out our proposed approach in order to give an opinion on the Fund's 2021/22 financial statements. Where there are findings from our interim audit to report we will incorporate those within our Audit Plan or Progress Reports.	June 2022	Not yet due
Audit Findings Report The Audit Findings Report will be reported to the September Pensions Committee.	September 2022	Not yet due
Auditors Report This includes the opinion on your financial statements.	September 2022	Not yet due
IAS 19 Assurance Reports to NAO Code of Audit Practice Employer Auditors We receive requests for assurances from other auditors. We respond to these on conclusion of sufficient work on the Fund's Statement of Accounts.	September 2022	Not yet due

Audit team changes

Your in-charge auditor for 2020/21 has left the Firm. Ben Stevenson has taken up the role. Ben has been introduced to your team and is looking forward to the opportunity of working with you.

Financial Reporting Council annual report

On 29 October, the Financial Reporting Council (FRC) published its annual report setting out the findings of its review of the work of local auditors. The report summarises the results of the FRC's inspections of twenty audit files for the last financial year. A link to the report is here:

FRC AQR Major Local Audits_October 2021

Grant Thornton are one of seven firms which currently delivers local audit work. Of our 330 local government and NHS audits, 87 are currently defined as 'major audits' which fall within the scope of the AQR. This year, the FRC looked at nine of our audits.

Our file review results

The FRC reviewed nine of our audits this year. It graded six opinion files (67%) as 'Good' and requiring no more than limited improvements. No files were graded as requiring significant improvement, representing an impressive year-on-year improvement. The FRC described the improvement in our audit quality as an 'encouraging response by the firm to the quality findings reported in the prior year.' Our Value for Money work continues to be delivered to a high standard, with all of the files reviewed requiring no more than limited improvement. We welcome the FRC findings and conclusions which demonstrate the impressive improvement we have made in audit quality over the past year.

The FRC also identified a number of good practices including effective challenge of management's valuer, use of an auditor's expert to assist with the audit of a highly specialised property valuation, and the extent and timing of involvement by the audit partner on the VFM conclusion.

Our "Opinion" results over the past three years are shown in the table below:

Grade	Number 2020/21	Number 2019/20	Number 2018/19
Good with limited improvements (Grade 1 or 2)	6	1	1
Improvements required (Grade 3)	3	5	2
Significant improvements required (Grade 4)	0	0	1
Total	9	6	4

Our "VFM" results over the past two years are shown in the table below. The FRC did not review VFM in 2018/19:

Grade	Number 2020/21	Number 2019/20
Good with limited improvements (Grade 1 or 2)	6	6
Improvements required (Grade 3)	0	0
Significant improvements required (Grade 4)	0	0
Total	6	6

Financial Reporting Council annual report (continued)

Quality Assurance Department (QAD) Reviews

In addition to the reviews undertaken by the FRC on major local audits, the QAD team from the ICAEW undertake annual reviews of non-major local audits as well as reviews of Foundation Trusts on behalf of NHSE&I.

The QAD reviewed five of our audits this year and graded all of them (100%) as 'Satisfactory / generally acceptable' for both the financial statements and VFM elements of the audit, which is the highest grading.

Grade	Number 2020/21	Number 2020/19	Number 2019/18
Satisfactory / generally acceptable	5	6	2
Improvement required	0	1	0
Significant improvement required	0	0	0
Total	5	7	2

Our continued commitment to Audit quality and continuous improvement

Our work over the past year has been undertaken during the backdrop of COVID-19, when the public sector has faced the huge challenge of providing essential services and helping safeguard the public during the pandemic. Our NHS bodies in particular have been at the forefront of the public health crisis.

As auditors we have shown compassion to NHS staff deeply affected by the crisis, whilst staying focused on the principles of good governance and financial management, things which are more important than ever. We are very proud of the way we have worked effectively with audited bodies, demonstrating empathy in our work whilst still upholding the highest audit quality.

Over the coming year we will make further investments in audit quality including strengthening our quality and technical support functions, and increasing the level of training, support and guidance for our audit teams. We will address the specific improvement recommendations raised by the FRC, including:

- Enhanced training for local auditors on key assumptions within property valuations, and how to demonstrate an increased level of challenge
- Having formal internal consultations when considering complex technical issues.

As part of our enhanced Value for Money programme, we will focus on identifying the scope for better use of public money, as well as highlighting weaknesses in governance or financial stewardship where we see them.

Conclusion

Local audit plays a critical role in the way public sector audits and society interact, and it depends on the trust and confidence of all those who rely on it. As a firm we're proud to be doing our part to promote good governance, effective stewardship and appropriate use of public funds.

Auditing developments

There are changes to the following ISA (UK):

- ISA (UK) 315 (Revised July 2020) 'Identifying and Assessing the Risks of Material Misstatement' - This will impact audits of financial statement for periods commencing on or after 15 December 2021.
- ISA (UK) 220 (Revised July 2021) 'Quality Management for an Audit of Financial Statements' - This will impact audits of financial statement for periods commencing on or after 15 December 2022.
- ISA (UK) 240 (Revised May 2021) 'The Auditor's Responsibilities Relating to Fraud in an Audit of Financial Statements This will impact audits of financial statement for periods commencing on or after 15 December 2021.

A summary of the impact of the key changes on various aspects of the audit is included below:

Area of change	Impact of changes
Risk assessment	• The nature, timing and extent of audit procedures performed in support of the audit opinion may change due to clarification of: • the risk assessment process, which provides the basis for the assessment of the risks of material misstatement and the design of audit procedures • the identification and extent of work effort needed for indirect and direct controls in the system of internal control • the controls for which design and implementation needs to be assess and how that impacts sampling • the considerations for using automated tools and techniques.
Direction, supervision and review of the engagement	• Greater responsibilities, audit procedures and actions are assigned directly to the engagement lead, resulting in increased involvement in the performance and review of audit procedures.
Professional scepticism	• The design, nature, timing and extent of audit procedures performed in support of the audit opinion may change due to: • increased emphasis on the exercise of professional judgement and professional scepticism • an equal focus on both corroborative and contradictory information obtained and used in generating audit evidence • increased guidance on management and auditor bias • additional focus on the authenticity of information used as audit evidence • a focus on response to inquiries that appear implausible
Definition of engagement team	• The definition of engagement team when applied in a group audit, will include both the group auditors and the component auditors. The implications of this will become clearer when the auditing standard governing special considerations for group audits is finalised. In the interim, the expectation is that this will extend a number of requirements in the standard directed at the 'engagement team' to component auditors in addition to the group auditor. • Consideration is also being given to the potential impacts on confidentiality and independence.
Fraud	• The design, nature timing and extent of audit procedures performed in support of the audit opinion may change due to: • clarification of the requirements relating to understanding fraud risk factors • additional communications with management or those charged with governance
Documentation	• The amendments to these auditing standards will also result in additional documentation requirements to demonstrate how these requirements have been addressed.

Sector Update

Funds and Authorities continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

- Grant Thornton Publications
- Insights from local government sector specialists
- Reports of interest
- Accounting and regulatory updates

More information can be found on our dedicated public sector and local government sections on the Grant Thornton website by clicking on the logos below:

Levelling up White Paper – Department for Levelling Up, Communities and Housing (“DLUCH”)

On 2 February the Department for Levelling Up, Communities and Housing (“DLUCH”) published its Levelling Up White Paper.

The paper states “Levelling up requires a focused, long-term plan of action and a clear framework to identify and act upon the drivers of spatial disparity. Evidence from a range of disciplines tells us these drivers can be encapsulated in six “capitals”:

- Physical capital – infrastructure, machines and housing.
- Human capital – the skills, health and experience of the workforce.
- Intangible capital – innovation, ideas and patents.
- Financial capital – resources supporting the financing of companies.
- Social capital – the strength of communities, relationships and trust.
- Institutional capital – local leadership, capacity and capability.”

The paper also states “This new policy regime is based on five mutually reinforcing pillars.” These are set out and explained as:

1) The UK Government is setting clear and ambitious medium-term missions to provide consistency and clarity over levelling up policy objectives.
2) Central government decision-making will be fundamentally reoriented to align policies with the levelling up agenda and hardwire spatial considerations across Whitehall.
3) The UK Government will empower decision-makers in local areas by providing leaders and businesses with the tools they need.
4) The UK Government will transform its approach to data and evaluation to improve local decision-making.
5) The UK Government will create a new regime to oversee its levelling up missions, establishing a statutory duty to publish an annual report analysing progress and a new external Levelling Up Advisory Council.

[Levelling Up the United Kingdom - GOV.UK (www.gov.uk)]

Grant Thornton – reaction to Levelling up White Paper

On 2 February the Department for Levelling Up, Communities and Housing ("DLUCH") published its Levelling Up White Paper.

Commenting on the release of the government's Levelling up White Paper plans, Phil Woolley, Head of Public Sector Consulting, Grant Thornton UK LLP, said:

"The publication of today's White Paper plans is a welcome first step and it is reassuring to see the government recognise the need for systemic changes in order to deliver its central aim of Levelling up. The '12 missions' can be seen as an attempt to consolidate existing elements of government activity behind a singular banner and now provides a clearer picture of the levelling up opportunity.

"Following a decade of successful regional devolution and mayors, the White Paper marks the next stage of the country's devolution journey. With government now offering a clear framework of devolved powers and accountability, local leaders will need to embrace the opportunity and collaborate across the public and private sector to ensure they negotiate and then deliver the best deal for their communities. Grant Thornton's Levelling Up Index shows that the economies of the 10 worst performing local authorities in England are on average over five times smaller than their best performing counterparts - highlighting the scale of the challenge ahead.

"To level up, these areas would need to grow their economies by £12billion, increase employment rates by 6 percentage points, create 1,700 new businesses a year and increase average weekly pay by £200. It is too early to determine whether the measures announced today will be sufficient, but it is a start. Success will ultimately depend on the ability and willingness of local and national government to translate these new frameworks into meaningful change in people's lives.

"The Spending Review offers the next opportunity for government to show its commitment by realigning departmental objectives behind these new goals."

Government response to MHCLG Select Committee report on Local Authority financial sustainability & the section 114 regime – MHCLG

Government has published a response to the Housing, Communities & Local Government (HCLG) Committee report on local authority financial sustainability and the section 114 regime, published in July.

The HCLG report states "In recent years, the financial sustainability of local government has faced successive challenges, including increased demand for services, especially social care, changes to the level of funding equalisation between councils and, most recently, the COVID-19 pandemic. In some instances, councils have been in such acute financial trouble that they have approached the Ministry of Housing, Communities and Local Government for financial assistance; three of these—Northamptonshire in 2018, Croydon in late 2020 and Slough in July 2021—issued section 114 notices, essentially declaring they had run out of money. Our inquiry has sought to identify the most serious threats facing local councils' finances. In light of the various factors we consider in the report, including the somewhat delayed Fairer Funding Review, renewed discussion about property taxes and the need to reform funding for social care, the time is right to consider a more radical review of local government finances—and our report makes various recommendations about how this should be done. We also consider what happened at Croydon—which prompted us to look at the section 114 regime—in the annex to our report."

The report includes sections on:

- Social Care
- Funding
- COVID-19
- Local authority commercial investment
- Audit and control

The report made 13 recommendations, and the Government response to these was published in October. The response notes "Moving forward, we will work to provide the sector with a sustainable financial footing, enabling it to deliver vital frontline service and support other government priorities. We will also take stock, including of the impact of the pandemic on local authority resources and service pressures, to determine any future reforms."

The initial report can be found here: https://committees.parliament.uk/publications/6777/documents/72117/default/

Government response can be found here: https://www.gov.uk/government/publications/local-authority-financial-sustainability-and-the-section-114-regime

Second Report of Session 2021–22

Report, together with formal minutes relating to the report

Ordered by the House of Commons to be printed 14 July 2021

Emergency consultation on 2021/22 reporting requirements – CIPFA

On 4 February CIPFA released an emergency four week consultation on time limited changes to the Code to help alleviate delays to the publication of audited financial statements. This explores two possible changes that might be made as an update to the 2021/22 code and to the agreed position in the 2022/23 code.

The decision to launch the consultation came after the Department for Levelling up, Housing and Communities (DLUHC) asked CIPFA to consider amendments to the Code of Practice on Local Authority Accounting, after just 9% of local audits for 2020-21 were published on time.

After considering a wide range of options CIPFA LASAAC decided to explore two approaches:

1) An adaptation to the code to allow local authorities to pause professional valuations for operational property, plant and equipment for a period of up to two years (though the initial proposal is for the 2021/22 financial year); this approach also explores the use of an index to be used to increase or reduce that valuation

2) Deferring the implementation of IFRS 16 Leases for a further year and reversing the planned changes to the 2022/23 code to implement that standard.

CIPFA Chief Executive Rob Whiteman said: “DLUHC is understandably concerned about this growing crisis – and CIPFA shares this concern. We are committed to supporting CIPFA LASAAC in its exploration of the options that may improve timeliness issues, without significantly impacting accountability. But this is a difficult issue, and we need feedback from stakeholders on whether and how this might work.”

CIPFA said that the changes do not represent the best form of financial reporting for local authorities, but are a “temporary expedient to help improve an unacceptable situation”.

The consultation closed on Thursday 3 March. Any updates to the Code are subject to oversight by the Financial Reporting Advisory Board before implementation.

The consultation can be found here:

https://www.cipfa.org/policy-and-guidance/consultations/emergency-proposals-for-update-of-202122-and-2022223-codes

Summary of the Grant Thornton response

Property, Plant & Equipment Valuations

In principle we are very supportive of changes to the measurement basis for operational property, plant and equipment. However our view is that it is too late to effect change for the 2021/22 reporting cycle. Our response highlighted a number of difficulties with this approach, including the risk that some assets then fall outside of the requirement to be revalued every five years as a minimum, and the challenge of consistent application of indexation. The proposed amendments to the Code do not appear to override the requirement that the carrying amount does not differ materially from that which would be determined using the current value at the end of the reporting period, which stems from IAS 16:31. If the financial reporting requirements are not sufficiently tightly defined and auditors therefore cannot obtain sufficient and appropriate audit evidence to support this requirement, there is a risk that audit opinions could be modified as a result.

Deferral of IFRS 16 - Leases

The removal of the requirement for disclosure (based upon IAS 8) in 2021/22 is not likely to have a significant impact in terms of freeing up auditor time and audit work covering the disclosures in 2022/23 would then be required in the 2022/23 audit. Savings to preparer time and effort would depend on what progress has already been made in preparing for the imminent implementation of IFRS 16.

17 March 2022 Update

CIPFA/LASAAC published its preliminary decision and feedback statement in response to the emergency Code consultation on 17 March 2022:

- CIPFA/LASAAC has decided not to progress any of the proposals around pausing formal valuation of assets.
- At this stage, CIPFA/LASAAC is pursuing the proposal on deferring IFRS 16 – however, it should be noted that this is subject to approval by the Financial Reporting Advisory Board.

The CIPFA/LASAAC feedback statement can be found at:

https://www.cipfa.org/policy-and-guidance/cipfa-lasaac-local-authority-code-board

Climate change risk: A good practice guide for Audit and Risk Assurance Committees – NAO

The National Audit Office (NAO) has published this guide to help Audit Committees recognise how climate change risks could manifest themselves and support them in challenging senior management on their approach to managing climate change risks.

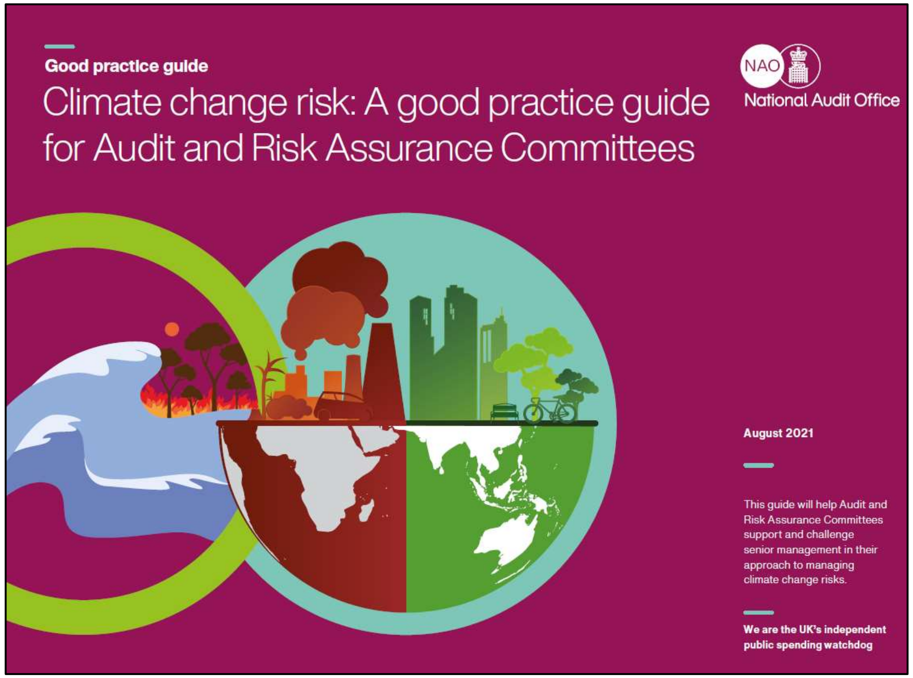
The NAO comment "Audit and Risk Assurance Committees (ARACs) play a key role in supporting and advising the board and Accounting Officer in their responsibilities over risk management.

This guide will help ARACs recognise how climate change risks could manifest themselves and support them in challenging senior management on their approach to managing climate change risks. We have outlined specific reporting requirements that currently apply.

Our primary audience is ARAC chairs of bodies that we audit, but the principles of the guide will be relevant for bodies across the wider public sector. It promotes good practice and should not be viewed as mandatory guidance.

Climate change and the nature of its impacts on organisations globally is changing rapidly. This guide acknowledges the evolving nature of climate change and its associated risks and opportunities and will be refreshed in the future to reflect those changes."

The guide includes sections on "How to support and challenge management". This includes sections on governance and leadership; collaboration; risk identification and assessment; risk treatment, monitoring and reporting and continual improvement. There is also a "Complete list of questions that Audit and Risk Assurance Committees can ask" for each of these areas. The guide also includes "Key guidance and good practice materials" with links.



The report can be found here:

[Climate change risk: A good practice guide for Audit and Risk Assurance Committees - National Audit Office (NAO) Report]

Local government and net zero in England – NAO

The National Audit Office (NAO) report responds to a request from the Environmental Audit Committee to examine local government and net zero. It considers how effectively central government and local authorities in England are collaborating on net zero, in particular to:

• clarify the role of local authorities in contributing to the UK's statutory net zero target; and

• ensure local authorities have the right resources and skills for net zero.

The NAO comment "While the exact scale and nature of local authorities' roles and responsibilities in reaching the UK's national net zero target are to be decided, it is already clear that they have an important part to play, as a result of the sector's powers and responsibilities for waste, local transport and social housing, and through their influence in local communities. Government departments have supported local authority work related to net zero through targeted support and funding. However, there are serious weaknesses in central government's approach to working with local authorities on decarbonisation, stemming from a lack of clarity over local authorities' overall roles, piecemeal funding, and diffuse accountabilities. This hampers local authorities' ability to plan effectively for the long-term, build skills and capacity, and prioritise effort. It creates significant risks to value for money as spending is likely to increase quickly.

MHCLG, BEIS and other departments recognise these challenges and are taking steps to improve their approach. Their progress has understandably been slowed by the COVID-19 pandemic, but there is now great urgency to the development of a more coherent approach."

Key findings include:

- Central government has not yet developed with local authorities any overall expectations about their roles in achieving the national net zero target.
- There is little consistency in local authorities' reporting on net zero, which makes it difficult to get an overall picture of what local authorities have achieved.
- Neither MHCLG nor HM Treasury has assessed the totality of funding that central government provides to local government that is linked with net zero.

The report can be found here:

https://www.nao.org.uk/report/local-government-and-net-zero-in-england/

Cyber and information security: Good practice guide – NAO

The National Audit Office (NAO) has published this guide to help Audit Committees scrutinise cyber security arrangements. To aid them, this guidance complements government advice by setting out high-level questions and issues for audit committees to consider.

The NAO state "Audit committees should gain the appropriate assurance for the critical management and control of cyber security and information risk.

Cyber security is the activity required to protect an organisation's data, devices, networks and software from unintended or unauthorised access, change or destruction via the internet or other communications systems or technologies. Effective cyber security relies on people and management of processes as well as technical controls.

Our guide supports audit committees to work through this complexity, being able to understand and question the management of cyber security and information risk.

It takes into account several changes which affect the way in which we interact with and manage our information and can drive increased risk. These include changes to the way we work and live due to the COVID-19 pandemic and the ongoing demand to digitise and move to cloud-based services.

The strategic advice, guidance and support provided by government has also been updated to keep pace with these changes, detailing the impact and risks on the management of cyber security and information risk.

The guide provides a checklist of questions and issues covering:

- The overall approach to cyber security and risk management
- Capability needed to manage cyber security
- Specific aspects, such as information risk management, engagement and training, asset management, architecture and configuration, vulnerability management, identity and access management, data security, logging and monitoring and incident management."

The report can be found here:

https://www.nao.org.uk/report/cyber-security-and-information-risk-guidance/
