

Vibrant, Safe & Sustainable Communities Panel

2 October 2014

Report title	Report on ASB Service Review and options' appraisal for future service delivery	
Cabinet member with lead responsibility	Councillor Elias Mattu Leisure and Communities	
Key decision	Yes	
In forward plan	Yes	
Wards affected	All	
Accountable director	Tim Johnson, Education and Enterprise	
Originating service	Community Safety	
Accountable employee(s)	Name	Karen Samuels
	Tel	01902 551341
	Email	Karen.samuels@wolverhampton.gov.uk
Report to be/has been considered by	Strategic Executive Board	18 September 2014
	Cabinet	12 November 2014

Recommendation(s) for action or decision:

- Comment on the options for the future delivery model of the city's Anti-social Behaviour Service; in particular on the preferred option (Option 4) detailed in this report which recommends:
 - Overall management of the city's ASB service by Wolverhampton Homes under a contractual arrangement with Wolverhampton City Council. Monitoring of the contract through a robust performance management framework;
 - Transfer of Undertakings (Protection of Employment) (TUPE) of Wolverhampton City Council staff to Wolverhampton Homes and a revised staffing model.
- Endorse the proposal to retain the existing arrangements for the management of domestic noise complaints.
- Endorse the proposal to procure a single supplier for legal services for ASB legal work.
- Endorse the application of a consistent approach to managing ASB cases in Tenant Management Organisation (TMO) properties by the introduction of a city-wide ASB policy.
- This item is being considered as pre-decision scrutiny and will therefore not be available to call-in once a decision is made by the Executive.

1.0 Purpose

- 1.1. To consider options for the future delivery of the city's Anti-Social Behaviour (ASB) Service.
- 1.2 To comment on the preferred option (Option 4) outlined within this report which will inform the presentation of a subsequent report to Cabinet on 12 November 2014.

2.0 Background

- 2.1 Tackling ASB is the top priority for the residents of Wolverhampton. Indeed, when questioned in the Residents' Opinion Survey 2013 about how they feel about their area, their biggest concern for their neighbourhood (36%) and city (42%) was ASB.
- 2.2 In response to feedback from service users and Councillors during 2011 and 2012 a joint review of ASB services was carried out by WCC's (former) Anti Social Behaviour Unit (ASBU) and Wolverhampton Homes (WH) to identify whether there were opportunities for an improvement in service to those residents of Wolverhampton who were experiencing ASB. The scope of the review was to consider the options for an improved service to include the feasibility of a single, cross tenure service to Wolverhampton residents.
- 2.3 Councillors were invited to contribute to the service review through two reports that were presented to the Safer Communities Scrutiny Panel. Recommendations from the Safer Communities Scrutiny Panel were incorporated into a final report that was approved by Cabinet in November 2012, recommending a new co-located model of service delivery between WCC and WH.
- 2.4 In May 2013, the new Wolverhampton ASB Team was launched; the key features of the service are:
 - A co-located team comprising 7 WCC and 13 WH staff.
 - A 'patch-based' delivery model whereby the city is divided into 6 co-ordinated areas that are co-terminus with Council Ward boundaries and neighbourhood policing areas.
 - WH has overall management responsibility of the ASB service, which is delivered through a service level agreement (SLA) with WCC. Under this arrangement, members of WCC staff previously assigned to the ASB Unit are seconded to WH.
 - A cross housing tenure service that also deals with non-housing ASB, e.g., city centre issues, open spaces, etc.
 - Tenant Management Organisations (TMOs) and Registered Social Landlords (RSLs) continue to manage their own ASB cases, however, the ASB Team is available to offer advice and support when requested to do so.
 - One central ASB reporting point of contact available to members of the public through City Direct.
- 2.5 It was agreed that the new co-located ASB service would be reviewed after one year. At a meeting of the VSSC Scrutiny Panel on 15 March 2014, Councillors provided input into the scope of the 12 month review, which was agreed would consider:
 - Performance and governance
 - Consistency and simplification

- New drivers for change
- Budget reductions
- An options' appraisal and recommendations for future service delivery

3.0 Findings of ASB Service Review 2014

3.1 Performance and governance

3.1.1 Number of cases dealt with

The table below provides a comparison of the number of new cases dealt with before and after the launch of the new ASB Team.

	Number of new ASB cases				
	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Total no. of new cases
2012/2013 (pre-ASB Team)	536	629	325	435	1925
2013/2014 (post ASB Team)	583	607	401	440	2031
	% increase of new cases since start of ASB Team				+5.2%

This represents an overall increase in new cases of 5.2% since the ASB Team started.

3.1.2 Compliance with service standards

The ASB Team service standards are currently under review; however, the following have been applied during the 2013/14 period:

- Category A: Serious – interview complainant within 1 working day
- Category B: Persistent – interview complainant within 2 working days
- Category C: Nuisance – interview complainant within 5 working days

The table below provides a comparison of compliance with service standards before and after the launch of the ASB Team.

Category of case	Comparison of compliance with service standards	
	2012/13 (pre-ASB Team)	2013/14 (post-ASB Team)
Category A	75.7%	75.7%
Category B	68.1%	67.1%
Category C	58.3%	71.5%

Compliance with service standards for Category A and B cases has remained static; there has been a 13% increase in compliance with service standards for Category C cases.

Councillors are requested to note that 100% compliance with service standards is extremely unlikely to be achieved. There are a number of factors which mean that complainants cannot be interviewed within the specified time period; these include:

- Where the complainant is anonymous;
- Where the complainant is unavailable for interview because of other commitments;
- Where the complainant does not wish to pursue their complaint any further;
- Where the person reporting the ASB is a partner agency, e.g., a police officer, concierge officer, neighbourhood wardens, etc*;
- Where the reported ASB is subject to a police investigation whereby it would not be appropriate to interview the complainant as to do so may prejudice a criminal investigation.

* Councillors are also requested to note that since the new ASB Team has been in place, enhanced working relationships with partner agencies have resulted in an increase in the number of ASB reports from these agencies.

3.1.3 Legal and non-legal remedies

- Prevention:
Preventative work plays a key role in stopping the escalation of ASB. Below are examples of preventative work the ASB Team delivers:
 - Members of the ASB Team undertake presentations on ASB in schools across the city, often in conjunction with Junior Warden Schemes.
 - The ASB Prevention Officer has forged close links with WH Housing Support Team and together they are working with families on the Wolverhampton 'Families in Focus' (FiF) programme.
 - Development of a FiF family fire course where parents and children work together on problem solving which leads to a BTEC qualification.
 - Development of a WH diversionary activity programme including Wolves Kickz project in Bilston and Whitmore Reans, Kik FM music project, Theatre Company presentations to young people on ASB.

- Enforcement action:

Below is a summary of enforcement action taken:

Enforcement Activity	2012/13 (pre ASB Team)	2013/14 (post ASB Team)
Anti-social Behaviour Orders (ASBOs)	4	11
Anti-social Behaviour Injunctions (ASBIs)/Undertaking to the Court	17	15
Notice of Seeking Possession (NOSP) – WH tenancies	58	84
Suspended Possession Orders granted	4	1
Evictions	4	2

3.1.4 Customer satisfaction

The table below provides a comparison of customer satisfaction rates before and after the launch of the new ASB Team.

Comparison of satisfaction with how case was dealt with pre and post ASB Team		
	Overall satisfaction with how case was dealt with %	Overall satisfaction with outcome %
2012/2013 (pre-ASB Team)	85.1	82.5
2013/2014 (post ASB Team)	91.7	88.8
% increase in satisfaction since start of ASB Team	+6.6%	+6.3%

Councillors will note that there has been an overall increase in customer satisfaction rates since the new ASB Team commenced.

3.1.5 Views of stakeholders

Within the Service Review, consultation with a range of stakeholders (including partner agencies, Councillors, customers and staff) has been conducted and the following themes have emerged:

What works well:

- The team works well together, WCC and WH staff have integrated well and all support each other;
- The vast majority of stakeholders are of the view that the team is providing a better service for customers (which is borne out by the customer satisfaction levels);
- Working relationships between the ASB Team and partners are strong, particularly the neighbourhood policing teams and WH Concierge Officers;
- Councillors who have accessed the ASB Team on behalf of their constituents have indicated they are generally pleased with the service they have received.

Areas for improvement:

- There is concern about the loss of the 3.0 FTE WCC posts under the WCC Medium Term Financial Strategy (MTFS), and the impact this will have on victims and on neighbourhoods and communities across the city (see Section 4).
- Because of the volume of cases, the focus of the team is on reacting to ASB reports as they come in. There is a strong feeling that there is a need for more proactive work to be done, including targeted work in neighbourhoods and communities where there is under-reporting.
- There was a strong feeling from city centre partners and businesses that more attention should be given by the ASB Team to the city centre. It was suggested that a 'business district' team was created that would mirror Wolverhampton Local Policing Unit's model which supports the city's business areas of the city;
- Some Councillors and other partners felt that more work should be done on publicising the ASB reporting line;
- Some Councillors and other partners asked that key contact names/contact details for the ASB Team be provided to all councillors;
- Some Councillors asked for more feedback on ASB cases in their areas;
- One Councillor felt that noise nuisance should come under the remit of the ASB Team;

- Some staff felt that the current staffing structure is too 'flat' and that the ratio of ASB Co-ordinators to Officers is too high; some felt there was not enough separation of duties to justify the pay differential between the ASB Co-ordinators and ASB Officers;
- The implementation and management of the 'Community Trigger' process (part of the ASB, Crime and Policing Act 2014 which comes into effect on 20 October 2014) will be undertaken by the ASB Team and the ASB Co-ordinators will have a key role in this process. There is concern about how, under the current structure, the team will have the capacity to deliver on this statutory area of work.

3.1.6 Governance arrangements

In terms of governance, WH currently has overall management responsibility of the ASB service, which is delivered through a service level agreement (SLA) between WCC and WH. The SLA is monitored by the WCC Assistant Director – Partnerships, Economy & Culture, the Head of Community Safety as well as WH Director of Housing through quarterly performance management framework (PMF) reporting. The quarterly PMF report contains data on the number of new cases, customer satisfaction, enforcement action, data trends and equalities monitoring. This report enables senior officers to monitor progress as well as highlighting any areas of business where remedial action may need to be taken. It is felt that this PMF reporting is robust and captures all the information necessary to ensure that the ASB service is effective.

3.1.7 Benchmarking against other similar organisations

The following information is drawn from Housemark ASB benchmarking report for 2013/2014.

Number of ASB cases per 1000 properties:

- Results based on data from 147 social landlords.
- Wolverhampton ASB Team manages 89 cases per 1000 properties.
- The average is 49 properties per 1000.
- Wolverhampton is ranked 127 out of 146 for case to property ratios.

Customer satisfaction:

- Results based on data from 66 social landlords
- For 2013/14, 92% of ASB complainants who accessed Wolverhampton ASB Team were satisfied with the way their ASB complaint was dealt with. The average is 76%.
- Wolverhampton is ranked 11 out of the 66.
- 89% of ASB complainants who accessed Wolverhampton ASB Team were satisfied with the outcome of their ASB complaint. The average is 70%. Wolverhampton ranked 12 out of 66.

Average cost of a case (2013/14):

- The average cost per ASB case was £372.25 (compared to £505.39 for 2012-13 – pre-ASB Team).
- The Housemark data for 2013/14 is not yet available; however, the national average cost per ASB case for 2012/13 was £709.

Average number of days taken to resolve ASB cases:

- Results based on data from 68 social landlords.

- Wolverhampton ASB Team took an average of 46 days to resolve an ASB case.
- The national average is 95 days.
- Wolverhampton ranked 8 out of 68.

3.1.8 Summary of performance

- The number of new ASB cases has increased by 5.2% compared to the previous year;
- Compliance with service standards has remained static. However, this is due largely to an increase in referrals from partner agencies which would not require the same response times as members of the public but, nevertheless, are included in the reporting parameters of the IT case management system;
- When compared to 2012/13, customer satisfaction rates have risen and are significantly higher than the national average;
- The average cost of managing ASB cases by the ASB Team has reduced and the average cost per case is significantly lower than the national average;
- The average time the ASB Team has taken to resolve ASB cases is significantly lower than the national average;
- Feedback from stakeholders on the effectiveness of the new ASB Team has been largely positive; there is a general feeling that customers are receiving a much better service;
- ASB Team staff feel that more proactive work is needed in neighbourhoods and communities, and some staff feel that the team structure is not working as well as it could do;
- There is strong support for more ASB resources to be deployed to the business areas of the city.

In summary, the data that is available and stakeholder feedback suggests that the co-located ASB Team is working effectively. Comments and suggestions about the team structure and the need for more proactive work to be carried out have been considered in the Options' Appraisal shown at Appendix 1 in this report.

3.2 Consistency and simplification

3.2.1 Arrangements for dealing with domestic noise

It was agreed at the VSSC Scrutiny Panel meeting on 13 March 2014 that consideration of domestic noise complaints should be included within the first year review of ASB services. Consequently, the officers carrying out the ASB Service Review have liaised with WCC Environmental Health to source details about their current delivery, data, volume of cases, performance and officer views on future service delivery; the information provided by Environmental Health is detailed below.

Under the current arrangements, Wolverhampton ASB Team deals with complaints of domestic noise in Wolverhampton Homes' tenancies. WCC's Environmental Health Public Protection Team deals with domestic noise in private housing. If, however, there is any associated ASB relating to private housing noise cases (e.g., verbal abuse, harassment, etc), then Public Protection will refer the case to the ASB Team; the ASB Team and Public Protection often work jointly on such cases.

Under these arrangements, up until 2014, Environmental Health have generally received and dealt with an average of 3,200 requests for service regarding noise every year. This figure covers all noise categories including domestic, dogs, commercial and industrial. Of this total, an average of around 1,200 have related to complaints concerning noise experienced out of normal office hours and approximately 1,000 requests for service each year have concerned domestic noise (i.e. voices, DIY, TV noise etc). The responses to these requests/complaints were made by a group of Senior, District and Compliance Officers with the specific cases allocated to employees of different grades in line with the complexity of the cases. In other words, the more complex cases involving technical and protracted investigations have been allocated to the more specialist Senior Officers whilst the high volume, less complex matters have been allocated to the more general Compliance Officers. 94% of these service requests/ complaints were responded to within the target time of 5 days.

- However, the 2014 savings' programme required that Regulatory Services reduce its ongoing spend by nearly £900K over the 2013/14 – 2014/15 financial years. In order to achieve this level of savings it was necessary to review both the Regulatory Services structure, the level/type of request complaint the service will be able to respond to in future and a number of key support budgets. Based on the outcome of the reviews a reduction of approximately 60% of the service's managerial/supervisory resource and 25% of the front line resource plus reductions to key support budgets was necessary. In addition, the following changes concerning the noise service will be implemented as from 1 October 2014:
- As a result of the savings' targets and associated review, it was clear that a business case no longer existed to maintain the out of hours service. Accordingly, it was decided to replace the out of hours service with an emergency only service which, from 1 October 2014, will only respond in cases where an individual's health, safety and wellbeing are at serious imminent risk.
- Out of hours requests/complaints will continue to be logged and, where appropriate, responded to the following working day. Where no visit is necessary, advice will be provided.
- In addition, noise cases involving Wolverhampton Homes are no longer referred to Environmental Health to review and are instead, fast tracked through to the ASB Team by City Direct.
- There is now a single lead officer in relation to all noise issues including domestic, commercial and industrial as well as those received via the emergency arrangements. This officer is Anna Spinks who is one of six new Service Leaders replacing the previous three Service Managers and 13 Section Leaders under the previous structure. This Service Lead will develop policy and procedure in relation to noise issues going forward.
- Discussions will progress with City Direct to develop more streamlined approaches for dealing with the higher volume of requests/complaints of the lowest priority (e.g., one-off referrals involving a single barking dog or noise from a summer garden party). It is intended to explore the feasibility of extending the use of standard letters and advice packs to deal with complaints of this nature in future.

Although it would be possible to lift and shift the domestic noise service out of Environmental Health (around 1000 requests p.a.) there are a number of issues this would generate and a number of associated difficulties:

- Noise can potentially give rise to a statutory nuisance under the Environmental Protection Act 1990. Other nuisance types include dust, effluvia, animals, premises etc.
- All nuisances have to be dealt with in a specific fashion as set out in statute culminating in the issue of an appealable legal notice and in the case of noise nuisance, potentially involving the seizure of sound generating equipment.
- The expertise around noise and nuisance lies within Environmental Health where there are a number of trained and competent employees capable of responding to requests for service and complaints whether domestic, commercial or industrial and whether they arise during day time, weekend or evening.
- There is a set procedure within Environmental Health for authorising appropriately experienced employees to undertake such work. In authorising employees, the Council is required to satisfy itself they are competent to identify statutory nuisances correctly and deal with them in accordance with legal provisions. The reputational risk to the authority of making an incorrect assessment of a noise nuisance could be significant.
- The bespoke equipment used in many domestic noise investigations is located in Environmental Health where employees are trained in its use and it is also used in other noise investigations.
- Noise issues are often closely linked to other environmental issues such as pests, drainage problems, untidy premises, accumulations and fly-tipping etc. It is common for Environmental Health employees to encounter these matters when responding to noise complaints and the training and general competences of these officers enables them to do so without the need for a hand-over.
- The new Service Lead has responsibility for all noise issues including commercial, industrial and domestic sources. This arrangement enables a consistent approach to be adopted across Wolverhampton City Council and also promotes consistency across the region and nationally as there are well established liaison arrangements in place across the Midlands specifically put in place for this purpose.
- The current arrangements provide a single point of contact for all statutory nuisance issues and, with the exception of Wolverhampton Homes premises where it can be dealt with efficiently as a tenancy related matter, all noise issues as well.
- A significant proportion of the higher volume issues are dealt with by Grade 5 Compliance Officers. It is difficult to calculate the average cost of a domestic noise complaint but it is believed to be in the region of £75 - £100. This is mainly because very few have escalated to result in legal action.

In view of the above detail, it is suggested the provision of an on-going domestic noise service is best placed within Environmental Health where it has been delivered successfully from for a great number of years. To unpick these arrangements would have a number of disadvantages which appear to outweigh any advantages.

3.2.2 Commissioning of legal services

Under the current arrangements, legal work relating to ASB in Council tenancies managed by WH is outsourced to a private firm of solicitors. Legal work relating to private and non-housing related ASB is provided by WCC's Legal Department.

This arrangement continues to work well. The vast majority of ASB legal work affects Council tenancies. The outsourcing of work to private solicitors enabled WH to make significant savings. The use of different solicitors has not presented any major issues to

the team and both continue to provide an excellent legal service. WH's contract with the private solicitors has been extended for a final year and expires in April 2015 and will have to be re-tendered. WCC has expressed an interest in competing for the tender when advertised.

Although the current arrangements work, it is recommended that consideration be given for there to be a single supplier of legal services with regard to ASB. Dealing with one supplier will ensure consistency of approach and advice across all ASB managed by the team and, subject to a procurement process, may realise further efficiencies. The same standards will apply to all cases with one contract/service level agreement.

3.2.3 Management of ASB cases in TMO properties

Under existing arrangements, TMOs are responsible for investigating and managing ASB complaints relating to tenancies within its area. Each of these organisations is responsible for tenancy enforcement action within their own managed stock. The ASB Team is available to provide expert advice and support to TMOs if required.

In order to improve the management of ASB cases and clearly define areas of responsibility, a protocol has been developed between the TMOs and the ASB Team.

The ASB Team will continue to provide expert advice and support to the TMOs if required. Examples of this are advice on casework, assistance with acceptable behaviour contracts, training of staff, and the shadowing of ASB Officers.

Referrals of vulnerable victims of ASB may also be made by the TMOs to the Victim and Witness Support Officer who is based within the ASB Team

A survey on the management of ASB was circulated to the TMOs. It is clear from the results that there is not one ASB policy that is being employed city-wide across all Council tenancies. Work will commence, in partnership with the TMOs, to introduce a new city-wide ASB policy that reflects best practice and the new ASB legislation

3.2.4 Human Resources (HR) implications relating to staff terms and conditions

As outlined above, since May 2013, WCC staff have been seconded to WH but remain on WCC terms and conditions. Since the implementation of the new ASB Team, some disparities have been highlighted between WCC and WH pay, terms and conditions and policies. These include:

- A significant pay/grading differential between WCC and WH staff as a result of Single Status;
- Enhancements for WH staff working outside of normal hours which have been withdrawn from WCC staff under Single Status;
- Car allowances;
- Differences in the Management of Attendance Policy between the two organisations.

Whilst these issues have been well managed and contained there is a need to resolve them in the interests of long term employee relations. Consequently, these have been considered as part of the options' appraisal for future management of the service.

Following any potential transfer of staff, the new employer can negotiate changes to terms and conditions which have been covered by an existing collective agreement or other arrangement, following the appropriate 'waiting period' after transfer, which is currently 12 months. Any such renegotiation must ensure that the overall contract is not less favourable to the employee in question (Collective Redundancies and TUPE). Normal consultation to vary terms and conditions would be required to be undertaken by Wolverhampton Homes.

Wolverhampton Homes would be in a position to renegotiate, after 12 months, terms and conditions from the collective agreement, provided that overall the employee's contract is no less favourable as a result. In addition, changes to transferred employees' terms and conditions as a result of the transfer itself are invalid; however, a change could be valid if the principal reason for it is, for example, an economic, technical or organisational reason, which brings about changes to the numbers or functions of the workforce.

4. New drivers for change

4.1 ASB, Crime and Policing Act 2014

The ASB, Crime and Policing Act 2014 comes into force on 20 October 2014. The Act sees the existing 19 powers reduced to 6. Of particular note is the introduction of 'The Injunction'; this replaces the Anti-social Behaviour Order (ASBO) and existing ASB Injunction. The Injunction is similar to the existing ASB Injunction which is currently only available to social housing providers. The injunction is housing tenure-neutral and is designed to be a quicker and less costly legal power to address behaviour that causes harassment, alarm and distress to members of the public.

Also of note is the Community Trigger, the aim of which is to enable members of the public to hold agencies to account if they feel the ASB they are reporting is not being dealt with. The proposed threshold for the Community Trigger and arrangements for managing the process locally are currently being formulated. It is proposed that the ASB Team Manager will manage the Community Trigger process in Wolverhampton. Working alongside the ASB Co-ordinator Wolverhampton Local Policing Unit (LPU), the ASB Team Manager will be responsible for ensuring the Community Trigger is managed appropriately and in line with Home Office guidance.

Councillors are requested to note that there is no additional funding available from government for implementation of the new legislation. The Community Trigger process, which is a statutory requirement, will have to be managed within existing ASB Team resources and the increased workload involved in managing the Community Trigger process should not be underestimated. The impact of these changes will be kept under review, as it is likely to result in a further reduction in the ability of the ASB service to respond to enquiries.

The ASB, Crime and Policing Act 2014 places a greater emphasis on agencies working closely together to ensure ASB is dealt with effectively. In Wolverhampton, relationships across partner agencies are already strong. However, from July 2014, the ASB Co-ordinator from Wolverhampton Local Policing Unit is now based in the ASB Team office for half of the week. It is felt this move will enhance information sharing and place us in a stronger position to identify vulnerable victims of ASB and act accordingly.

4.2 Budget reductions

A savings target of £150,000 has been identified for the WCC Community Safety Service (which includes the WCC ASB Team staff) and is included in the Medium Term Financial Strategy (MTFS) for 2017/18. This will potentially result in a reduction of 3.0 FTE WCC posts from the ASB Team.

Also, in addition, an indicative 5 year WH management fee freeze is proposed by the Council from 2014/15.

Feedback from staff and partner agencies has raised concerns about the impact the loss of the 3.0 ASB Team posts will have on service users and service delivery.

A full equality analysis has been completed which outlines the impact of proposed cuts to the WCC ASB service from 2017/18. This analysis has revealed that a higher than average number of women and disabled clients access the service, indicating that these groups are more likely to be more negatively impacted as a result of reductions in service.

As well as carrying out enforcement activity, a key focus of the ASB service is supporting victims of ASB as well as preventative work to stop ASB escalating. Feedback from stakeholders suggests that a reduction of posts within the ASB Team will lead to an escalation of ASB which will be more costly in the longer term. Furthermore, in light of the significant reductions in youth services across the city, there is an expectation that there will be an increase in demand for ASB prevention work amongst young people.

The concerns about the potential loss of posts from the ASB Team have been recognised and the recommended option detailed in Section 5 retains 2 of the 3 posts, whilst still allowing the proposed budget reductions to the WCC Community Safety service to be realised. This will help to reduce any loss in service to the above groups with protected characteristics.

5. Options' appraisal and recommendations

5.1 Options

The ASB Service Review has considered the feedback from stakeholders and also the HR issues raised. Accordingly, four options have been developed for consideration detailing how ASB services across the city could be delivered going forward. A full options' appraisal is detailed in Appendix 1 but below is a summary of the four options:

- **Option 1: Revert back to two separate ASB functions**
This option will see the ASB service split, with a return to the ASB Unit (WCC) managing ASB in private housing and non-housing ASB; the WH staff returning to their previous posts and ASB cases managed by generic WH Estate Managers.
- **Option 2: Retain the existing staffing structure and management arrangements**
This option will retain the existing staffing structure (Appendix 1). WCC staff will continue under the secondment arrangement to WH.
- **Option 3: New staffing structure and TUPE transfer of WH staff to WCC**
This option will see a new staffing structure (Appendix 2). A total of 13 WH staff will TUPE transfer to WCC.

- **Option 4 – New staffing structure and TUPE transfer of WCC staff to WH**
This option would see a revised staffing structure. WCC staff will TUPE transfer to WH. 2 of the 3 ASB Team posts identified to be deleted under the MTFs will be retained. Under this proposal, the WCC savings will be realised earlier than 2017/18, with WH funding 50% of the posts from April 2015 until March 2017 and 100% of the posts from April 2017 onwards.

5.2 Preferred option – Option 4

- 5.2.1 The preferred option, which has been developed in response to feedback from all stakeholders, is Option 4. The key features and advantages of this option are detailed in Appendix 1.
- 5.2.2 Under this option, WH would have overall management responsibility of the city's ASB service under a contractual arrangement with WCC. The council would maintain oversight and influence over the service through contractual arrangements and service monitoring through a robust performance management framework.
- 5.2.3 The structure that will be proposed will retain the same number of posts, with existing WCC staff TUPE transferring to WH.
- 5.2.4 When fully implemented, the overall cost of the proposed new structure will realise savings of £78,000, but with a net increased cost to WH of around £11,000. This reflects that the funding provided by WCC will reduce as part of its financial cuts.

6.0 Financial implications

- 6.1 The total cost of the ASB Team (WCC and WH staff) structure at top of spinal point and 2014/15 prices is £683,000. The maximum cost to WCC of this structure is £264,000. Savings of £150,000 have been identified across the Community Safety Service (which includes the WCC ASB Team staff) from 2017/18. This includes the potential deletion of 3 WCC posts from the ASB Team.
- 6.2 The preferred Option 4 is based upon WCC continuing to fund four posts within the structure not affected by budget saving proposals by an adjustment to WH annual management fee. WH will provide funding for 50% of the costs of 2 of the 3 posts identified to be deleted under the WCC Savings' Programme from April 2015 until March 2017 thus realising an accelerated saving for WCC of £35,000 per annum (two years earlier than proposed). WH will then fund 100% of these 2 posts thereafter. When fully implemented in 2017/18, the proposed structure will realise annual savings of £89,000 for WCC. [MF/23092014/A]

	2014/15	2015/16	2016/17	2017/18	Total
<i>WCC Funding</i>	263,900	228,900	228,900	174,700	896,400
<i>WH Funding</i>	419,900	454,900	454,900	431,300	1,761,000
Total	683,800	683,800	683,800	606,000	2,657,400
Increased cost to WH per annum	n/a	35,000	-	(23,600)	11,400
Reduced cost to WCC – per annum	n/a	35,000	-	54,200	89,200

7.0 Legal implications

- 7.1 Sections 5 and 6 of the Crime and Disorder Act 1998 require the Council and other responsible authorities to formulate and implement strategies to reduce crime and disorder in the area.
- 7.2 Section 17 of the Crime and Disorder Act 1998 (amended) requires the Council along with the other Responsible Authorities to exercise their functions with due regard to do all that they reasonably can by way of preventing crime and disorder, ASB, substance misuse and re-offending in the locality.
- 7.3 As outlined in 3.1 above, the new ASB, Policing and Crime Act comes into force from 20 October 2014. A local implementation plan is currently being worked through and a separate report will be presented to the VSSC Scrutiny Panel on 2 October 2014, to the Strategic Executive Board on 9 October 2014 and the Executive Board on 22 October 2014.
- 7.4 Under the TUPE Regulations 2014, the terms and conditions of any employees transferring to the new employer remain as they currently exist. However, as stated in paragraph 3.2.4 above, terms and conditions from a collective agreement can be renegotiated after 12 months following the transfer provided that, overall, the contract is no less favourable to the employee. Wolverhampton Homes would be in a position to renegotiate, after 12 months, terms and conditions from the collective agreement, provided that overall the employee's contract is no less favourable as a result. In addition, changes to transferred employees' terms and conditions as a result of the transfer itself are invalid; however, a change could be valid if the principal reason for it is, for example, an economic, technical or organisational reason, which brings about changes to the numbers or functions of the workforce.

[AS/19092014/H]

8.0 Equalities implications

- 8.1 A full equality analysis has been completed which outlines the impact of proposed cuts to the WCC ASB service from 2017/18. A higher than average number of women and disabled clients access the service, indicating that these groups are more likely to be more negatively impacted as a result of reductions in service. However, the preferred Option 4 mitigates this by retaining 2 of the 3 posts identified to be deleted under the WCC MTFs, thus allowing the current level of service for victims of ASB to continue.

9.0 Environmental implications

- 9.1 There are no environmental implications associated with this report.

10.0 HR implications

- 10.1 As outlined above, Wolverhampton ASB Team is a co-located service comprising of 7 WCC and 13 WH staff. WCC staff are seconded to WH but remain on WCC terms and conditions which includes a significantly higher basic salary level following Single Status. Since the implementation of the new ASB team, significant disparities have been highlighted between WCC and WH terms and conditions and policies. If the TUPE

transfer went ahead, WH would be in a position to renegotiate, after 12 months, terms and conditions from the collective agreement, provided that overall the employee's contract is no less favourable as a result. In addition, changes to transferred employees' terms and conditions as a result of the transfer itself are invalid; however, a change could be valid if the principal reason for it is, for example, an economic, technical or organisational reason, which brings about changes to the numbers or functions of the workforce.

11.0 Corporate landlord implications

- 11.1 The ASB Team will continue to be housed within WH premises. There are no corporate landlord implications relating to the proposals contained within this report.

12.0 Schedule of background papers

- 12.1 Report to Safer Communities Scrutiny Panel on 26 January 2012, ASB Service Review (Agenda Item 7).
- 12.2 Report to Safer Communities Scrutiny Panel on 13 September 2012, ASB Service Review (Agenda Item 5)
- 12.3 Report to Cabinet on 14 November 2012, ASB Service Review (Agenda Item 5D).
- 12.4 Report to VSSC Scrutiny Panel on 13 March 2014, Progress report on the Wolverhampton Anti-social Behaviour (ASB) Team and scoping paper for one year service review (Agenda Item 9).
