Subject: PRE1508 - NEWPREMISES LICENCE - Bantock Park, Finchfield Road, Wolverhampton WV3 9LQ

Importance: High

Sensitivity: PROTECT

Good Afternoon

The agent has signed the mediation document attached. Therefore, acting in my capacity as Responsible Authority for the Environmental Health, my concerns raised in my representations have been allayed and subject to the amendments being made to the operating schedule, this should negate the need for a hearing, subject to no further representations from any other person or Responsible Authority.

Kind Regards

Faye

Mediation Outcome -

On 6th January 2023, a mediation meeting was held with the applicant to discuss proposed amended licence conditions, following representations by the Environmental Health Section, in regard to the Prevention of Public Nuisance in its capacity as a Responsible Authority. An email detailing the proposed amended licence conditions was sent to the applicant following this meeting. In a return of email dated 9th January 2023 from the applicant it has been indicated that they are in agreement with the proposed conditions.

Public Nuisance

In relation to Public Nuisance it was agreed that the following conditions would be added to the Premises Licence replacing condition 1 and conditions 4-11 detailed in the application:

Pre-Event

To ensure residential amenity is suitably safeguarded the following information must be provided no later than 3rd March 2023:

1. A scaled plan-layout depicting the siting and orientation of P.A. and/or other loudspeaker systems, along with electrical power generators and air compressors where used. To be agreed by the Local Authority.
2. The appointed acoustic control consultant shall carry out a survey to determine the background noise levels (as defined by the Code of Practice on Environmental Noise Control at Concerts) at locations around the venue representative of the noise sensitive premises likely to experience the largest increase in noise/highest noise level as a result of the concert.

3. Predicted sound levels associated with all operational loudspeaker systems (expressed as $L_{Aeq\ 15\ minutes}$) at residential premises located adjacent to the park 1m from the façade closest to the park and the most noise sensitive receptor positions.
4. Acoustic specifications of P.A. and other loudspeakers where utilised, including frequency-specific sound radiation characteristics.
5. Acoustic specifications of electrical power generators and air compressors.
6. Acoustic mitigation and control measures to ensure that a Music Noise Level, 65 dB $L_{Aeq\ 15\ minutes}$, is not exceeded over the course of the event.
7. A scheme detailing how sound levels from the proposed event will be monitored over its duration.
8. Residents letter drop to be sent out 4 months, 2 months, and 14 days prior to event to alert them to the event details. The letter drop area to be decided in consultation with the Local Authority (no later than 3rd March 2023).
9. A hotline phone number to be set up so that local residents will be able to contact the event organisers on event days for information or with concerns about public nuisance. The hotline phone number will be circulated to residents in advance of the event as part of the letter drops.
10. The above matters need to be addressed by a competent acoustician, the credentials of whom shall be agreed by Environmental Health prior to 3rd March 2023.

During Event

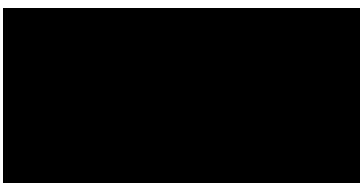

11. A noise propagation test shall be undertaken at least 6 hours prior to the start of the event in order to set appropriate control limits at the sound mixer position. The sound system shall be configured and operated in a similar manner as intended for the event. The sound source used for the test shall be similar in character to the music likely to be produced during the event.

12. The Licensee shall ensure that the promoter, sound system supplier and all individual sound engineers are informed of the sound control limits and that any instructions from the noise control consultant regarding noise levels shall be implemented.
13. The appointed noise control consultant shall continually monitor noise levels at the sound mixer position and advise the sound engineer accordingly to ensure that the noise limits are not exceeded. The Licensing Authority shall have access to the results of the noise monitoring at any time.
14. Rehearsals and sound checks are permitted only between the following hours: 12:00 hrs to 22:00 hrs. Prior notification to be given to Environmental Health in regard to when these checks will be undertaken (at least 24 hours' notice).
15. Music from the event is permitted only between the following hours:
12:00 hrs to 22:00 hrs on 17th June 2023.
16. A record shall be kept of any monitoring, including the date, time, and location of monitoring; the name of the monitor; and any action taken.
17. Records shall be made available upon request by a police officer or an authorised officer of the Council.

Following Event

18. A post Event Noise Monitoring Report should be provided summarising noise levels throughout the event, any complaints received and how they were managed. To be provided to Environmental Health within 14 days of the event.

Applicant Signature:

A solid black rectangular box used to redact the applicant's signature.

Date 9 January 2023

I, Robert Edge, Licence Leader Ltd, on behalf of New Vision Events Limited for the Bantock Park Event, Wolverhampton agree to modify my premises licence application to include the above amendments/conditions in my operating schedule.

Environmental Health – Responsible Authority Signature:

Date 9th January 2023

Subject to the above amendments/conditions being added to the operating schedule Environmental Health agree this should negate the need for a hearing subject to no further representations from any other Persons/Responsible Authority.
