Dear ███████

Many thanks for the reply to my email.

It would seem as though the main source of your objection relates to the issues with parking. This is generally outside of the remit of premises licensing and the subcommittee, however I can tell you that we are working with the Council's events team to try and find a resolution; additionally this is something that will be discussed with the Council's Public Events Safety Advisory Group (PESAG) and we would hope to find a solution. It is not fair when people visit a concert and then park causing a nuisance to residents.

I would hope that you will trust me to resolve this issue and therefore consider withdrawing your objection to the premises licence.

Many thanks for the opportunity to mediate with you.

Kind regards
Rob

Hi. It has been suggested by Elizabeth Gregg that i should contact you direct in respect of the June 2023 event in Bantock Park. She forwarded your response letter but it does not seem to answer or tackle my concerns about the parking in the roads that surround the Park. I live on ████████ where people were parking on both sides of the road, there were no "No parking" cones or stewards preventing this happening. I witnessed a near miss accident as a family stepped out between parked cars, this to say the least was frightening. The parking is, I feel, just as important as to what will go on within the Park. Sensible, logical parking as opposed to parking without consideration for others needs to be addressed. To be honest i do wonder whether this Park in the middle of a residential area is the right venue for this type of event.

Thank you, ████████████
